The Sample Snatchers! Sample Subway System

The Sample Subway! A device capable of snatching a precise sample from inside a metal tube in a matter of seconds! It has traction wheels for movement, a powerful scraper for sampling and a precise containment system that keeps the sample protected and isolated from operator contact!

Prototypes

About the Project

Client: Canadian Nuclear Laboratories (CNL)

Project Goal:

Develop a device to retrieve a metal sample that weighs 30-80 mg from inside a 15-foot long tube with a 4-inch internal diameter. The tube may be oriented vertically or horizontally.

Background:

CNL operates in environments with high radiation and limited access. Sampling metal from deep within infrastructure is essential for monitoring structural integrity, but poses unique challenges.

Our Solution:

The Sample Subway is a device that scrapes and collects a sample from a nuclear reactors pressure tube wall to be analyzed for hydrogen embrittlement. It is able to do so remotely, minimizing operator contact. The container is self sealing and measures the mass so that the operator never has to touch the material collected.

Key Features:

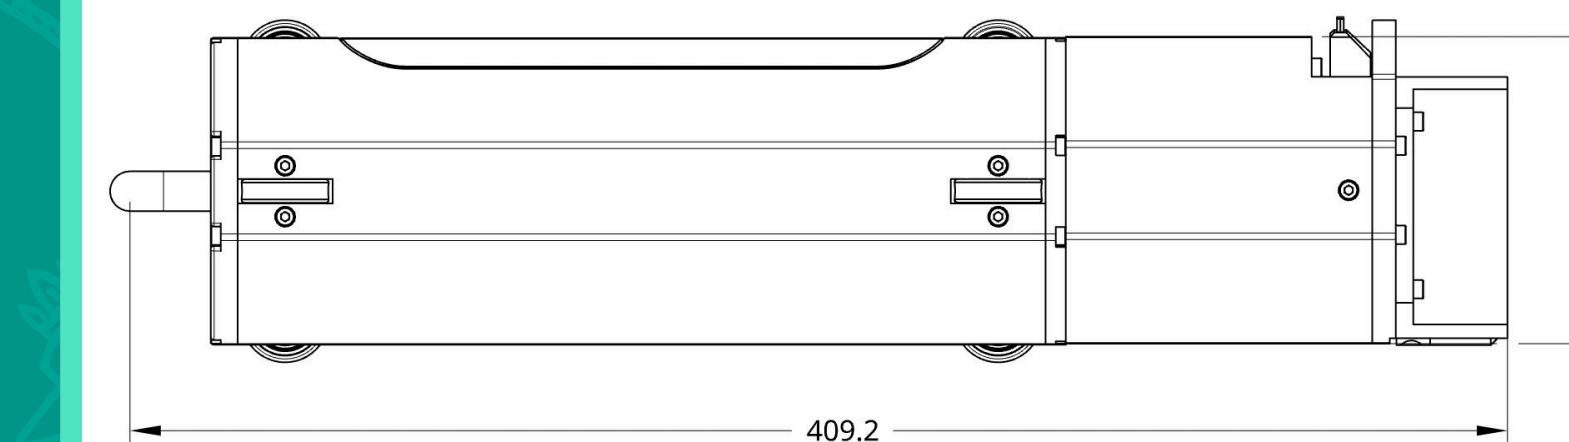

- Safe Handling: Sample is automatically stored in a sealed container
- Sampling: Mechanism scrapes for a sample between 30-80mg
- Operator Feedback: Real-time tool and process status
- Fail-Safe Design: Tool can be fully retrieved in case of failure using a winch
- Lightweight: A single operator can carry and deploy the device
- Self-Contained Power: Integrated power sources included

Problem Statement:

"Operators who service nuclear reactors need a device to collect metal samples from pressure tubes while minimizing exposure to contaminated material. The solution should be compact and completely removable from the pressure tube, and it should also be able to report the stage of operation within a limited time."

Technical Specifications

Load Cell Accuracy:	+/- 9.5 mg
Containment:	Isolated Spring Loaded Mechanism
Power System:	Custom 12.6V 40A Removable Battery Pack
Scraping Motor:	1 x JGB37-520 12V 12RPM 35kg.cm
Movement Motor:	2 x N20 12V 200RPM
Fail-safe:	Custom Winch Mechanism
Control System:	ESP32 w/ HX711 ADC, ITB2 + L293D Motor Drivers
Chassis Materials:	PETG Body, PLA Motor Mounting Plates, 608 Bearings, M3 Screws
Scraping Bit:	NC3030 Lathe Bit

Bill of Materials

Battery and Power Delivery (PDXX)			
Item #	Part	Vendor	Description
PD01	22 awg Wire	Amazon	Wires for connecting components to circuit
PD02	XT80 Connectors	Alexpress	Connectors for battery pack
PD03	16 awg Wire	Amazon	Wires for 12v components
PD04	P42A Moliceil Battery 21700	18650...	For battery pack assembly
PD05	3S Battery Management System	Aliexpress	For safety
PD07	LM2596	Aliexpress	Step down buck converter, 36V/24V/12V/5V/3V

Control and Logic (CLXX)			
Item #	Part	Vendor	Description
CL01	ESP32-WROOM-C3	Elegoo	Controller w/ WiFi + BT
CL02	H-Bridge Motor Driver BTS7960	Aliexpress	Driving 12V motor for scraping
CL03	HX711 Sensor	Aliexpress	Strain gauge for mass analysis

Measurement (MX)			
Item #	Part	Vendor	Description
M01	100g Lead Cell	Aliexpress	Strain gauge to measure mass

Structural Components (SCXX)			
Item #	Part	Vendor	Description
SC01	PLA - ~0.70 KG	Bambu	Filament for chassis
SC02	M3 Female Threaded Insert	Aliexpress	Heat set threaded inserts for chassis
SC03	M3/M4 Machine Screws	Aliexpress	Various length M3 Machine Screws

Sampling Tooling Components (STXX)			
Item #	Part	Vendor	Description
ST01	Lathe Bit	Aliexpress	Lathe Bit and arbor
ST02	GB37-520 7mm 12V Motor	Aliexpress	For moving the armature with lathe bit

Movement (MVXX)			
Item #	Part	Vendor	Description
MV01	Bearings	Aliexpress	For reducing friction and precise movement
MV02	N20 12V 200RPM	Aliexpress	Moves the device through the pipe
MV03	Rubber Bands	Amazon	Increases Friction of wheels, prevents slippage
